b. *General warrant*: a warrant for the apprehension of the persons suspected of an offence, no individual being named or particularly described in special.

According to Blackstone, the practice of issuing general warrants, founded on some clauses in the Acts (of Charles II) for regulating the press, was inadvertently continued after those Acts expired in 1694, and (except during the last four years of Queen Anne) remained down to 1763. In that year the arrest of John Wilkes on a general warrant raised the question of the legality of such warrants. In 1765 the Court of King's Bench decided that they were illegal, and in 1766 this was affirmed by a vote of the House of Commons.

The early examples below relate to feudal law, under which the 'warranty' given by the grantor of a freehold estate obliged him to yield to the grantee other lands of equal value if the latter should be evicted. For *collateral, lineal warranty* see those adjs.

II. 2. One whose occupation is warfare; a fighting man, whether soldier, sailor, or (latterly) airman; in eulogistic sense, a valiant or an experienced man of war. Now chiefly *poet.* and *rhetorical*, exc. as applied to the fighting men of the ages celebrated in epic and romance and of uncivilized peoples, for whom the designation *soldier* would be inappropriate.

The word found a memorable application in the designation of 'The Unknown Warrior', who on 11 Nov. 1920 was honoured with a stately funeral in Westminster Abbey as the representative of all who had given their lives for England in the great war. To which of the services he belonged was kept a secret, so that the comprehensive word 'warrior' was both necessary and felicitous.

War-wolf.

1. *Hist.* A kind of siege engine.

A translation of *lupus belli*, occurring in the *Flores Historiarum* ('Matthew of Westminster') in the account of Edw. I's siege of Stirling in 1304, where it is said that the battering-ram (*aries*) proved almost useless, but that the less costly 'war-wolf' was much more effective. In an AF. document relating to this siege (*Cal. Docum. Scot.* II. 405), the same machine is mentioned as 'le lup de guerre'. The med.L. *lupus* is found elsewhere as the name of a military engine, but nothing seems to be known of its nature. The conjecture that *war-wolf* is a perversion of WERWOLF is unfounded.

1. In popular language, any insect of the genus *Vespa*; chiefly applied to *V. vulgaris*, the Common Wasp, and such other species as are not readily distinguishable from this; sometimes taken to include the Hornet, *V. crabro*, which resembles the Common Wasp, but is larger and has a more powerful sting. The obvious characteristics of the genus are the alternate rings of black and yellow on the abdomen, the narrow stalk or petiole by which the abdomen is attached to the thorax, the fully developed wings, and the formidable sting (which, however, is peculiar to the females and the workers or imperfect females). In scientific language applied generally to two divisions of hymenopterous insects, the Diploptera or true wasps, and the Fossores or digger wasps.

The true wasps (*Diploptera*) are divided into three families; (1) *Vespidæ*, to which the common wasp belongs; (2) *Eumenidæ*; and (3) *Masaridæ*.

Wassail (wɒ·s'l, wæ·s'l, -eil), *sb.* Now only *arch.* and *Hist.* Forms: 3 wæs hæil, wæshail, washayl, washail, wesseyl, 3–4, 7 wassayl, 3, 6–7, 9 *arch.* wassaile, 5 wassaylle, wessayle, (whatsaile, -saill), 6 wassaill, -ayle, 6–7 wassall, 7–8 wassal, (7 vassaile, *Hist.* was-haile, washeall, waes heal, 9 waisall, waissel, *arch.* was-hael), 5–9 wassel(l, 3– wassail. [ME. *wæs hæil* etc., a. ON. *ves* (= later *ver*) *heill*, corresp. to OE. *wes hál* lit. 'be in good health' or 'be fortunate': see Be *v.* A. 3 and Whole *a.*

As an ordinary salutation (= 'hail' or 'farewell') the phrase, or an approximation to it, occurs both in OE. (*hál wes þú*, and in pl. *wesað hále*: see Be *v.* A. 3) and in ON. (pl. *verið heilir*). But neither in OE. nor in ON., nor indeed in any Teut. lang., has any trace been found of the use as drinking formulas, of the phrases represented by *wassail* and *drinkhail*. It seems probable that this use arose among the Danish-speaking inhabitants of England, and became more or less common among the native population; in the 12th c. it was regarded by the Normans as markedly characteristic of Englishmen. The earliest known occurrence of the phrases is in Geoffrey of Monmouth VI. xii. (*c* 1140), in the well-known story of Rowena (*wes heil..drinc heil*: v.r. *was heil*, printed edd. corruptly *wacht heil*). Geoffrey's attribution of the phrases to the 5th century is an anachronism; the original story as told by Nennius contains nothing corresponding to them. In Wace's *Brut* (*c* 1180), which is a metrical version of Geoffrey, various MSS. have *weshel, waisseil, gasel; drinkel, drincheheil, drechehel.* That Wace's acquaintance with the 'English' phrases was not wholly derived from the passage in Geoffrey is shown by his reference to them in the *Roman de Rou*, where it is said that the night before the battle of Hastings was spent by the English in revelry, with cries of *weissel* (v.rr. *wesse heil, welseil, weseil*) and *drincheheil* (v.rr. *drinceseil, drinqueheil, drinkeil*). In the *Speculum Stultorum* of Nigellus Wireker (*c* 1190) the English students at the university of Paris are praised for generosity and other virtues, but are said to be too much addicted to *wessail* and *dringail*. The earliest example of the phrases in an English context is in Layamon's translation of Wace.

In *drinkhail* the second element is, as in *wassail*, the ON. adj. *heill* used as complement. Although the phrase *drekk heill* is not recorded in ON., it has an exact syntactical parallel in *sit heill*, 'sit in health'. Whether the form of the first element in *drinkhail* is due to OE. influence or is archaic Scandinavian is doubtful; the form *drechehel* in one MS. of Wace is noteworthy from its resemblance to the ON. of the literary period.]

IV. A timepiece.

†**19.** An alarm-clock, or an alarum attached to a clock. *Obs.*

The sense in the first example is doubtful, as the Latin rendering is omitted; but on etymological grounds it seems likely that the sense 'alarum' is the oldest of the senses of this branch. With the form *wecche* in quot. 1440 cf. *wecche*, Wetch *v.* (trans.) to awaken.

21. A small time-piece with a spring-driven movement, and of a size to be carried in the pocket.

The occasional occurrence of the term *pocket-watch* (see quot. 1705 below) suggests that the word was sometimes applied to spring-driven clocks of larger size. From the beginning of the 17th c. 'watches' (from the context clearly pocket watches) are often spoken of as striking.

22. A trial-piece of glass, pottery, copper, etc. put in a furnace and taken out again, to enable the workman to judge of the degree of heating and the condition of the material operated on.

[App. a mistranslation of F. *montre*, in this application used in the sense of show-piece (from *montrer* to show), but commonly meaning a watch (timepiece).]

Watchet (wǫ·tʃĕt), *sb.* and *a.* *Obs.* or *arch.* Forms: [? 2 waachet] 4 waget(t, vachet, 4–7 wachet(t, 5 waycett, 6 wattchett, watchit, -eth, watchshide, wattahode, wetshode, 6–7 watched, watchett, 7 watcht, wetched, -et, 6– watchet. [App. a. OF. (north-eastern) *wachet*, occurring A. D. 1420 (*une heuke . . foree de wachet*, a cloak lined with 'watchet'; it is not clear whether this means a particular fabric or a colour); an earlier instance, spelt *waschet*, occurs in quot. 1198 below; the use of the OF. word in an Anglo-Latin context at that date does not prove that it had already been adopted into English. It is possible that *waschet*, *wachet* may be a dim. of the word which is found once (spelt *wasce*) in a Douay document of 1262; Godefr. explains this as 'sorte d'étoffe', but the interpretation is not certain from the context. The Central OF. *gasche*, recorded once (1448), for some kind of appendage or ornament of a shoe, would correspond formally, but if Godefr. is right in rendering it 'buckle' the connexion is out of the question.

It is tempting to compare mod. Walloon *waiss* royal blue (which Diez would connect with OF. *gueade* WOAD); a dim. formation on a word of this meaning might have been used to denote a lighter shade of the colour. But the phonological possibility of such a derivation of *wachet* is very doubtful.]

Wa·ter-mark, watermark, *sb.* [Mark *sb.*[1] Cf. G. *wassermarke* in various senses.]

† **1.** *Sc.* A bonndary mark indicating the line of separation between the waters of different rivers (belonging to different proprietors). *Obs.*

Trade, Water-mark*,..the float-line or sinking depth of a ship. 1883 W. C. Russell *Sailors' Lang., Water-marks*, the figures on a ship's stern showing the depth of water she draws.

5. A distinguishing mark or device impressed in the substance of a sheet of paper during manufacture, usually barely noticeable except when the sheet is held against strong light.

So G. *wassermarke* (1785); the more common word is now *wasserzeichen* (*zeichen* sign). The name was prob. given because the water-mark, being less opaque than the rest of the paper, had the appearance of having been produced by the action of water.

Mag.* XLIX. 374/1 He [Mathison] had discovered a method of counterfeiting the water-mark of the bank paper. 1787 Fenn *Orig. Lett.* I. Pref. p. xxi. *note*, The paper-marks are those figures formed by wires, on the sieve at the bottom of the mould in which the paper is made, and are impressed on it in its pulpy state...They are often called the water-marks. 1870 E. Cornish *Jane Austen* x. 226 As the water-marks in the original manuscript are 1803 and 1804 it could not have been written before that time.

b. The metal design from which the impression is made.

1854 C. Tomlinson *Obj. Art-Manuf., Paper* 22 The singular names of the older kinds of paper appear to have some connection with the devices formed in them by the water-marks. Water-marks are ornamental figures in wire or thin brass, sewn upon the wires of the mould, and like those wires, they leave an impression, by rendering the paper where it lies on them, thinner and more translucent.

Wa·ter-mea·sure. A kind of measurement formerly used for coal, salt, fruit, etc., sold on board vessels in port or in the river.

The bushel of water-measure seems to have been originally the ordinary bushel heaped; the statute of 1495 ordained that it should contain five pecks of striked measure, thus exceeding the ordinary bushel by one-fourth. A 'water-measure' exceeding the standard measure in a much larger proportion seems to have been used for coal shipped from northern ports: see quot. 1708, and cf. quot. 1851 under Chaldron 2.

This is called water-measure, and it exceeds Winchester measure by about three gallons in the bushel.

¶ 2. In Ps. xlii. 7 (Bible version) the word is now commonly apprehended as an example of sense 3 below. It was, however, probably intended as a metaphorical use of sense 1; and it seems likely that the meteorological sense 3 arose from recollection of the passage of the psalm.

The Heb. word *çinnōr*, here rendered by 'waterspout', occurs elsewhere only in 2 Sam. v. 8, where it has been interpreted 'spout or gutter on a roof': so Vulg. *domatum fistulas* (Wyclif 1382 'the goters of the hows eues,' Douay 'the gutters of the house toppes'): the Bible of 1611 has 'the gutter', and the Revised Version 1881 'the water-course'. In the psalm, the word is rendered in the LXX. by *καταῤῥάκτης* and in the Vulg. by *cataracta* (Wycl. 'gooteris', Douay 'floud-gates'); the mod. translators from the Heb. essayed to find a literal rendering in accordance with the apparent sense of the word in 2 Sam. v. 8; hence Pagninus has *fistularum* (whence Coverdale by misapprehension renders 'whistles'); the Great Bible (1539) has 'water-pipes'.

1611 Bible *Ps.* xlii. 7 Deepe calleth vnto deepe at the noyse of thy water-spouts.

3. *Meteorol.* A gyrating colnmn of mist, spray, and water, produced by the action of a whirlwind on a portion of the sea and the clonds immediately above it.

Watling-street (wɒ·tlĭŋstrīt). Forms: 1 Wæclinga-, Wæxling(g)a-, Wætlinga-, Weatlinga-stræt, 2 Watlingestrate, 3 Watelinge stret, 4 Wat(e)lynge-, 5 Watlyn-, 5 Wadlyng-, Wattelynge-, 6 *Sc.* Vadland-, 6 Watlyng-, 6– Watling-. [OE. *Wæclinga stræt*; the first word, app. the genit. pl. of the name of a (real or imaginary) family or clan, occurs also in *Wæclinga ceaster* ('the Wæclings' city'), the OE. name of the Roman-British Verulamium (now St. Albans), through which the 'Watling-street' passes.

The forms with *tl* for *cl*, which have been universal from the 12th c., are all but non-existent in MSS. of pre-Conquest date; a solitary example is *Wætlinga ceaster* in *OE. Martyrology*, *St. Alban*, 22 June (MS. Cott. Julius A. x. fol. 112, written *c* 975). The change of *Wæclinga* into *Wætlinga* can hardly be due to the close resemblance of *c* and *t* in OE. script (though many instances of the latter form in modern editions of OE. texts are mere editorial misreadings), because the existence of sense 2 seems to show that the name of the Roman road was preserved in popular and not merely literary tradition. Perhaps the word may have been assimilated to the *Wætlinga* which occurs in the place-name Watlington (Oxon and Norf.).

The Wæclings may have been either an actual family that had obtained possession of the site of Verulamium, or a dynastic family celebrated in Mercian tradition, to whom, as typifying remote antiquity, the road and the city were attributed by popular fancy. It has been suggested that *Wæclinga ceaster* is a corruption of *Werlamæ ceaster*, an alternative OE. name of Verulamium (*Uæclingacestir siue Uerlamacester*, Bæda *H. E.* I. vii), which is an adoption of the British name in a later form; but the conjecture is untenable.]

1. The English name given in pre-Conquest times to the Roman road running from near London through St. Albans to Wroxeter; by antiquarian writers from the 12th c. onwards extended to Roman roads leading from London to the S.E. and from Wroxeter to the north or west.

The places mentioned in OE. charters as situated on or near the 'Wæclinga-stræt' are: Hampstead; Chalgrave (Beds.)‡ Stowe (Bucks.); Weedon (Northants); Aston (close to Wroxeter): see Birch *Cart. Sax.* Nos. 1309, 659, 986, 792, 1315. According to Henry of Huntingdon (*died* 1154) the Watling-street extended from Canterbury to Chester; according to Robert of Gloucester (*c* 1290) from Dover to Chester; according to Higden (*c* 1340) from Dover to Wroxeter and thence to Cardigan. Modern writers usually assign Dover or Richborough and Chester as the terminal points; but some apply the name Watling-street to the road running northwards from Wroxeter through Lancashire.

Watt (wɒt). *Physics.* [f. name of James *Watt* (1736–1819), the inventor of the modern steam-engine, and a pioneer in the science of energy.] A unit of activity or power (used chiefly with reference to electricity), corresponding to 10^7 ergs of work per second, to the rate of work represented by a current of one ampere under the pressure of one volt, or to $\frac{1}{746}$ (= ·00134) English horse-power.

1882 Siemens in *Rep. Brit. Assoc.*, Presid. Addr. 6 The other unit I would suggest adding to the list is that of power. The power conveyed by a current of an Ampère through the difference of potential of a Volt is the unit consistent with the practical system. It might be appropriately called a Watt, in honour of..James Watt...A Watt, then, expresses the rate of an Ampère multiplied by a Volt, whilst a horse-power is 746 Watts, and a Cheval de Vapeur 735. 1882 *Athenæum* 2 Sept. 310/2 Two of his [Dr. Siemens's] units were unanimously approved—namely, (1) the watt, which is the rate of doing work when a current of one ampere passes through a resistance of one ohm, [etc.]. 1886 Thurston in *Jrnl. The bark of most of these trees is valuable for use in tanning, and they exude a gum resembling gum arabic. The golden yellow flowers are celebrated for their beauty and fragrance.

The acacias were included in the Linnean genus *Mimosa*. Hence in popular use *mimosa* was long current as a synonym of *wattle*, and is still sometimes so used, at least in England. See Mimosa 1 b.

Wattle (wɒ·t'l), *sb.*[2] Also 6 wattell(e, 7 **waddle, wadle.** [Of obscure origin; possibly an altered form of Wattle (which, however, does not appear so early in our quots.), due to assimilation to prec.

Usually believed to be identical with Wattle *sb.*[1] On the ground of the reading 'a *watel* ful of nobles' in two closely related MSS. of *Piers Plowman* C (where other MSS. have *walet*) it has been assumed that from the primary sense of 'something intertwined' (see prec.) was developed the senso 'basket', and hence that of 'wallet', which would be a possible source of the senses below. (Cf. Shaks. 'wallets of flesh': see Wallet *sb.*[2]) This explanation is connected with the view that *wallet* is a metathesis of *watel*; but in all probability the reading *watel* in *Piers Plowman* is merely a scribal error for *walet*.]

5. Modern scientific uses.

a. *Physics.* Each of those rhythmic alternations of disturbance and recovery of configuration in successively contiguous portions of a fluid or solid mass, by which a state of motion travels in some direction without corresponding progressive movement of the particles successively affected. Examples are the waves in the surface of water (sense 1), the waves of the air which convey sound, and the (hypothetical) waves of the ether which are concerned in the transmission of light, heat, and electricity.

Hertzian waves: a class of ether-waves (discovered by the German physicist Heinrich Hertz in 1888) similar to light waves but of much greater wave-length.

1832 BREWSTER *Nat. Magic* viii. (1833) 195 They will produce each equal waves of sound. 1833 [see *wave-surface, -theory*]. 1839 G. BIRD *Nat. Philos.* 292 The waves of light, like those of sound, are transmitted in every direction. 1846 GREENER *Sci. Gunnery* 50 It is necessary so to prolong the explosion, that the wave of vibration has time to travel throughout the whole of the mass acted upon. 1860 TYNDALL *Glac.* II. i. 227 An aërial wave of sound travels at about the rate of 1100 feet in a second. 1863 — *Heat* viii. 257 The condensation and rarefaction [of the air] constitute what is called a sonorous pulse or wave. 1889 ROWLAND in *Amer. b. *Meteorol.* A change of atmospheric pressure or temperature, consisting of gradual rise and fall or fall and rise, taking place successively at successive points in some particular line of direction on the earth's surface. In popular language, a 'heat-wave' or a 'cold wave' denotes a spell of abnormal heat or cold, which is assumed to be travelling over the country in a particular direction.

1843 SIR J. F. W. HERSCHEL in *Rep. Brit. Assoc.* 61 If

this minimum represent..the trough of a barometric wave which at 3 A.M. was vertically over Brussels, and at 11 A.M. over London, the wave must have been travelling westwards. 1846 W. R. Birt in *Rep. Brit. Assoc.* I. 147 Now a wave generated in any way and approaching the continent of Europe from the north-west would most probably impinge on it with a high..crest...Again a negative wave, with a deep trough..would present large fluctuations as it impinged on the land. 1901 *Scotsman* 4 Oct. 5/1 When a cold wave strikes Northern Minnesota, there is no knowing where the thermometer may go.

1851 Carpenter *Man. Phys.* (ed. 2) 214 Successive contractions and relaxations may be produced..by a single prick with a scalpel; a sort of wave of contraction being transmitted in the direction of its length. 1885 Romanes *Jelly Fish* etc. i. 25 A stimulus applied to a nerveless muscle..giving rise to a visible wave of contraction, which spreads in all directions. *Ibid.*, I shall always speak of muscle-fibres as conveying a visible wave of contraction, and of nerve-fibres as conveying an invisible, or molecular, wave of stimulation.

Outside Teut. the word occurs as Lith. *wãskas,* OSl. *voskŭ* (Russ. ВОСКЪ, Pol. *wosk,* Czech *vosk*), but prob. adopted from Teut. The root may be identical with Teut. **waχs-* to grow (Wax *v.*[1]); it seems not impossible that the etymological sense may have been 'that which grows (in the honeycomb)'. The view now most in favour refers the word to the Indogermanic root **veg-* to weave, found in OIrish *figim* I weave, L. *vēlum* veil, sail (believed to be from prehistoric **veg-slom*), and in certain Teut. words (see Wick *sb.*[1]); the advocates of this etymology appeal to the apparent semasiological parallel of G. *wabe,* honeycomb, presumed to be from the root of *weben* Weave *v.*[1] Some other hypotheses have been proposed, but they are all unsatisfactory with regard either to form or meaning.]

1. A substance (also distinctively called Bees-wax) produced by bees, and used by them as the material of the honeycomb. It is a secretion of special glands in the abdomen, mixed with the secretion of the salivary glands in the process of mastication; when slightly warmed it is readily moulded into any shape, and when heated to about 150° melts into a liquid; in its natural state it is of a bright yellow colour. *Butter of wax*: see Butter *sb.*[1] 3. Cf. *wax-butter* in 12.

Chemically beeswax is a combination of palmitic, cerotic, and melissic acids with myricil alcohol.

It forms a part of the green fecula of many plants, particularly of the cabbage; it may be extracted from the pollen of most flowers; as also from the skins of plums, and many stone fruits. It constitutes a varnish upon the upper surface of the leaves of many trees, and it has been observed in the juice of the cow-tree. The OTeut. conjugation of the verb is retained in Goth., OHG., OS., and ON.; in OE. it is confined to the Northumbrian dialect (pa. t. *wóx*); the WS. pa. t. *wéox* and the Du. *wies* are due to the analogy of the reduplicating verbs.

The strong pa. t. became rare after the 14th c., and is now wholly obsolete; the one or two examples in the poetry of the 18–19th c. are deliberately archaistic. For the pa. pple. the Bible of 1611 has *waxed* four times and *waxen* eight times; in recent use *waxen* is not unfrequent when the verb is conjugated with *to be*, but is otherwise very rare.]

Originally a more frequent synonym of Grow *v.*, which has now superseded it in general colloquial use, exc. with reference to the moon (see 6). With this exception, the senses below which are not marked as obsolete are confined to literary use, and have, in varying degrees, a somewhat archaic flavour; some of those under branch I survive only in the traditional antithesis with Wane *v.* The verb is said still to be current in certain dialects: see *Eng. Dial. Dict.*

† **Wa·xen**, *v.*[1] *Obs.* Also **wexen, weaxen.**

In several writers of the 16th c. (chiefly poetical) the forms *waxen, wexen* occur for Wax *v.*[1], but only in those parts of the verb (inf. and 3rd pers. pl. present) in which these were in ME. the normal inflected forms of *wax*. This may sometimes be due to intentional grammatical archaism; but when these forms are used by writers whose grammar is in all other respects normal, it seems probable that the inflexional *waxen* in quotations from older writers was mistaken for a verb synonymous but not identical with *wax*. It has been thought desirable to give here all the examples in our material, in order that their individual significance may be judged of by comparison. The 17th c. quots. from H. More, which are added for completeness, are of course intentionally archaistic.

Qualified by poss. pron., the word often occurs as object or as adverbial accusative to the verb *go* (see Go *v.* 21 b) and its synonyms, †*fare*, †*fere* (see FARE *v.* 1, FERE *v.*), *wend*, etc. From an early period *my*, *his* (etc.) *way* in these collocations were often nearly equivalent to 'away', and with this weakened sense they were formerly used with other verbs of motion, as *flee* (see FLEE *v.* 1 d), *run* (see RUN *v.* 34), *come*, *pass*, *ride*. In present literary use *to go, wend one's way* survive as archaisms; mod. dialects have only the imperatives *go, come your* (*thy*) *way* (or *ways*: see 23 b).

c. In the Bible phrase *to go the way of all the earth* (Josh. xxiii. 14, 1 Kings ii. 2) meaning 'to die'. Also in erroneous forms (due to confusion with other Bible passages), *the way of all flesh, of all living*. (*The way of all flesh* has sometimes been used to mean the experience common to all men in their passage through life.)

A passage (dated 900) in Birch's *Cartul. Sax.* II. 241 'Quando Ælfred rex..viam vniverse carnis adiit', shows that the substitution of 'of all flesh' (*universæ carnis*) for 'of all the earth' (*universæ terræ*) was current in med. Latin. The reading of the Douay Bible (quot. 1609) suggests that the substitution must have found its way into some printed copies of the Vulgate; also, the Plantin Concordance (1642) reads *carnis* s. vv. *Caro* and *Ingredior*, though elsewhere the two passages are cited with the reading *terræ*.

In Acts ix. 2, xix. 9, 23, xxiv. 14, 22, the Greek has 'the way'; the only English translation that has the literal rendering in all the passages is the Revised Version of 1881 ('the Way', with capital). In ix. 2 Wyclif, following an error in some MSS. of the Vulgate, has 'this life'; later versions down to 1611 have 'this way'. In xix. 9 and 23 Wyclif, after some MSS. of the Vulgate, has 'the way of the Lord' (so, in verse 9, Tindale 1526 and Geneva 1557); later versions of verse 23 down to 1611 'that way'. In xxiv. 14 Wyclif has 'the sect' (after Vulg. *sectam*), Tindale and Geneva 'that way', Cranmer and 1611 'the way'. In xxiv. 22 Wyclif has 'the way', Geneva 'this sect', and other versions down to 1611 'that way'. In Acts xxii. 4 the Greek has 'this way', which all the English translators render literally.

IV. 23. Uses of *ways* as a singular.

a. The genitive *ways* (OE. *weges*) occurs in many advb. phrases in which it is combined with a preceding pronominal adj. Most of these phrases came to be written as single words, and are treated as such in this Dict.: see Anyways, Noways, Otherways (OE. *ôðres weges*) and -ways *suffix*. Other similar collocations, now *Obs.* or *dial.*, are *each ways, this ways, that ways, which ways, the same ways*, synonymous with 'each way', 'this way', etc. (see 9, 9 b, 14 d).

† Occas. also with a prep., as *in each ways, by this ways*.

Now only *dial.* and *vulgar*, and chiefly in the imperative; in rustic use *come thy ways* is often addressed playfully to children and animals.

c. In *a good, great, little, long ways* (now only *dial.*), the origin of the use of *ways* for *way* is obscure.

It might possibly have arisen from the analogy of phrases containing the advb. genitive (see a and b). There is no known instance in OE. of such a construction as **lytel weges* (= 'paululum viæ'), which might possibly account for it.

Way, obs. form of WEIGH *v.*, WEY, WHEY, WOE.

-way (wēⁱ), as a terminal element of advs., is identical with WAY *sb.*[1]

1. Phrases consisting of the sb. qualified by an adj. are often used adverbially (see WAY *sb.*[1] 8, 14 d, etc.), and some of the combinations of adj. and sb. thus used have come to be apprehended as single words, and so pronounced and written; the second element, losing its separate stress, has assumed in some degree the aspect of an adverbial suffix. The only early example of this process is the OE. *ealne weg*, an adverbial accusative, which after the disappearance (in the 14th c.) of adjectival flexion became ALWAY (q. v. for the development of meaning). *Anyway, everyway, noway, someway*, written as single words, are not found before the 16th c. The only advs. in *-way* f. descriptive adjs. are *broadway* (16th c.), *crossway* (early 17th c.), *straightway* (as two words in 15th c.; as one word from 1530). Most of the above-mentioned advs. have parallel and synonymous forms in -WAYS.

2. The few advs. f. sb. + *-way* do not originate from phrases, but are genuine compounds; they all have parallel forms in -WAYS. †*Needway* 'necessarily' occurs in Barbour *c* 1375 (*needways* in *Cursor M. a* 1300). *Edgeway, endway, sideway, sunway*, which denote direction of movement, are, like the corresponding forms in -WAYS, not older than the 16th century.

3. *Crossway* and *sideway* are frequently used as adjs.; the other advs. in *-way* expressing spatial direction would perhaps admit of a similar use, but it is not evidenced in our quotations.

1893 *Times* 20 Sept. 3/6 This system, which became known as the 'waybill' system, was worked in this way. When a destitute wayfarer left a casual ward in the morning, he could, on application, obtain a waybill or passport, on which were recorded..the day and hour at which the bearer left it, and the route on which he was travelling, [etc.]. 1897 *Church Times* 20 Aug. 187/1 Any poor traveller..will be..fed, lodged, and passed on, the following morning, with a stamped way-bill, to the next lodging-house on the route.

Wayryngle, variant of Wariangle *Obs.*

-ways, the terminal element of certain advs., was originally a use of the genitive of Way *sb.*[1]

1. Many phrases consisting of the genitive of *way* (in various senses) qualified by an adj., were formerly used adverbially (see Way *sb.*[1] 23 a). The earliest known examples are in the Peterborough Chronicle (first hand, A. D. 1124) which twice has *ðöres weges* in the sense 'by another route'; in this phrase the adj. appears uninflected before the end of the 12th c. (see Otherways). Similarly *alles weis, nanes* (*nones*) *weis* occur early in the 13th c., becoming *always, noways* in the 14th c. On the analogy of these words were subsequently formed †*everyways* (1398), *anyways,* †*likeways* (16th c.), and (from descriptive adjs.) *crossways, longways, straightways* (16th c.), *broadways* (18th c.).

2. A solitary instance of an adv. f. sb. + *-ways* before the 16th c. is †*needways* 'necessarily', occurring in the *Cursor M.* (*a* 1300) and in Barbour. In the later formations the general sense is 'in a specified direction'; so *endways, lengthways, sideways* (16th c.), *edgeways, breadthways* (17th c.), *sternways* (19th c.), *sunways.*

3. As there is no perceptible difference of function between the adverbial genitive and the adverbial accusative, most of the advs. in *-ways* have synonyms in *-way.* Further, most of the advs. in

-ways are synonymous with actual or possible parallel formations in -WISE; and the similarity of sound of the two suffixes has given rise to the notion that they are mere alternative forms of one and the same ending. Johnson's erroneous statement (s. v. *Way*) that '*way* and *ways* are often used corruptly for *-wise*' has probably led many to prefer *-wise* to *-ways* or *-way* on the ground of supposed correctness. Cf. *alway, always,* †*alwise*; *anyway, anyways, anywise*; *breadthways, -wise*; *broadway, -ways, -wise*; *crossway, -ways, -wise*; *edgeway, -ways, -wise*; *endway, -ways*; *everyway,* †*-ways*; *lengthways, -wise*; †*likeways* (obs.), *likewise*; *longways, -wise*; *noway, -ways, -wise*; *otherways, -wise*; *sideway, -ways, -wise*; *straightway, -ways,* †*-wise*; *sunway, -ways, -wise.*

4. The combinations of *-ways* are, unlike those of *-way*, hardly ever used as adjs., with the exception of SIDEWAYS.

Wayzgoose (wē·zgūs). [Alteration of Waygoose, under which the earlier evidence for the word is given.

The eccentrically spelt form *wayzgoose*, which, although established in recent use, has not been found, exc. in Bailey's Dictionary, earlier than 1875, is prob. a figment invented in the interest of an etymological conjecture (see quot. 1731). Bailey's assertion that the word had the sense of 'stubble-goose' is unsupported, and is very unlikely; this allegation, and the accompanying fantastic misspelling of Wase, may have been suggested by the idea that the obscure word *waygoose* could be explained on the assumption that it had lost a *z*. (The *Eng. Dial. Dict.* refers to Cope's *Hampshire Glossary* for '*waze-goose*, a stubble-goose', but Cope's authority for this is a MS. word-list which, he says, 'contained many words that had certainly no relation to the dialect of the county'.) It seems clear that the genuine traditional form among printers was *waygoose*, and that the form *wayzgoose*, now prevailing, is a supposed correction following the authority of Bailey. The statement that goose was 'the principal dish' (or even that it was eaten at all) at the 'waygoose' dinner is destitute of evidence. It is possible that *waygoose* may be a corruption by popular etymology of some earlier word, but no satisfactory explanation has been found either in English or in any foreign language.]

Originally, an entertainment given by a master-printer to his workmen 'about Bartholomew-tide' (24 August), marking the beginning of the season of working by candle-light. In later use, an annual festivity held in summer by the employees of a printing establishment, consisting of a dinner and (usually) an excursion into the country.

1731 Bailey (ed. 5), *Wayz*, a Bundle of Straw. *Wayzgoose*, a Stubble-Goose, an Entertainment given to Journeymen at the beginning of Winter. [1833 Tempերley *Songs of the Press* 23 *note*, Way Goose.—The derivation of this term is not generally known. It is from the old English word *wayz*, stubble. A wayz Goose was the head dish at the annual feast of the forefathers of our fraternity. '*Wayz Goose*, a stubble Goose, an entertainment given to journeymen at the beginning of Winter.'—Bailey.]

1875 Southward *Dict. Typogr.* 137 The wayzgoose generally consists of a trip into the country, open air amusements, a good dinner, and speeches and toasts afterwards. 1895 *Surrey Mirror* 23 Aug. 2/7 The members of the typographical staffs of the *Surrey Advertiser* (Guildford) and the *Surrey Mirror* (Redhill) had their wayzgoose on Saturday last, when they journeyed to Brighton.

[a. ON. *veik-r*, corresponding to OE. *wāc*: see WOKE *a.*

The earliest known examples are in the *Cursor Mundi* (*a* 1300, but MSS. 14th c.); the word gradually took the place of the corresponding native adj. (OE. *wāc*, ME. WOKE) which did not survive beyond the 15th c. There seems to have been some difference of meaning between OE. *wāc* and ON. *veikr*; in OE. the primary Teut. sense 'yielding, not rigid or firm, pliant' was still prominent, while in ON. it had developed into the sense 'not strong'.

The *β*-forms show the same development of Scand. *ei* to *ē* which is found in BLEAK *a.* (earlier *bleyke*, ON. *bleik-r*), STEAK *sb.* (ME. *steke*, *steyke*, ON. *steik*; still pron. dialectally with *ī*), and REAN, var. of RAIN *sb.*[2] (ON. *rein*).

In mod. dialect literature the word is often written *waik* or *wake*. Graphically, these forms belong to the *a* group; but in certain areas it may be doubtful whether the shade of pronunciation denoted by the spelling descends from ME. *ē* or from ME. *ei*. As the normal Sc. representative of OE. *wāc* is *wake*, which in late Scottish might have been written *waik*, it is possible that some of the Sc. examples given below belong etymologically to WOKE *a.* rather than to the present word.]

A. *adj.*

† 1. Of a material thing: Pliant, flexible, readily bending. (Usually with implication of want of strength.) = WOKE *a.* 1. *Obs.*

b. In the translations of the Bible from Tindale onward, used to render Gr. *ἀσθενής, ἀσθενῶν*, applied by St. Paul (esp. in Rom. XIV and 1 Cor. VIII) to believers whose scruples, though unsound, should be treated with tenderness, lest they should be led by the example of the more enlightened into acts condemned by their conscience. Hence allusively in *weaker brethren* (often supposed to be a scriptural phrase), applied to the more timorous members of a party, who are in danger of being shocked by extreme statements of principle or policy.

In the Wycliffite and other early versions the rendering is 'sick' (Vulg. *infirmus*).

The 14th cent. northern form *wel* (*well*) is merely a variant spelling, and the length of the vowel is proved by rhymes; but from the 15th cent. in midland and southern texts a real confusion between *wēle* and *wēl* appears, owing to the currency of double forms of the adverb 'well'. In consequence of this the noun is sometimes written *wel, weill*, or *welle*, and in this form is latterly identified in pronunciation with the adv. (For examples see WELL *sb.*[2]) On the other hand the adv. in the form *wele* or *weele* has influenced the meaning of the noun in sense 4 below, and probably contributed to its use in sense 3 (and in WEAL-PUBLIC) as an equivalent of L. *bonum* and F. *bien.*]

d. Abundance of possessions or of valuable products, as characteristic of a people, country, or region; the collective riches of a people or country.

4. *Economics.* A collective term for those things the abundant possession of which (by a person or a community) constitutes riches, or 'wealth' in the popular sense.

There has been much controversy among economists as to the precise extent of meaning in which the term should be used. The definition that has been most widely accepted is that of Mill (quot. 1848 below).

1821 Torrens *Ess. Product. Wealth* i. 3 When we say, a man of wealth, the term implies quantity, and signifies an abundance of the comforts and luxuries of life. But when we say, agriculture is a source of wealth, the accessory idea of quantity is not implied, and the term comprises the products of agriculture, whether they be raised from one acre or from a million; whether they are capable of subsisting an individual, or a nation. 1845 Bentham *Ration. Reward* 237 All wealth is either the spontaneous production of the earth, or the result of labour, employed in the cultivation of the earth or upon the materials which it yields. 1832 Hr. Martineau *Life in Wilds* ii. 23 Whatever lives, or grows, or can be produced, that is necessary or useful, or agreeable to mankind, is wealth. 1848 Mill *Pol. Econ.* I. Prel. Rem. 8 Money, being the instrument of an important public and private purpose, is rightly regarded as wealth; but everything else which serves any human purpose, and which nature does not afford gratuitously, is wealth also. *Ibid.* 9 To an individual, anything is wealth, which, though useless in itself, enables him to claim from others a part of their stock of things useful or pleasant. Take for instance, a mortgage of a thousand pounds on a landed estate. This is wealth to the person to whom it brings in a revenue...But it is not wealth to the country; if the engagement were annulled, the country would be neither poorer nor richer. *Ibid.* 10 Wealth, then, may be defined, all useful or agreeable things which possess exchangeable value; or in other words, all useful or agreeable things except those which can be obtained, in the quantity desired, without labour or sacrifice. 1856 Froude *Hist. Eng.* (1858) I. i. 87 An attempt..was made to bring the production and distribution of wealth under the moral rule of right and wrong. 1883 H. Sidgwick *Pol. Econ.* I. iii. 72 The wealth of any individual is considered to include all useful things—whether material things, as food, clothes, houses, &c., or immaterial things as debts, patents, copyrights, &c.—which..admit of being sold at a certain price. This aggregate is suitably measured by its exchange value; the common standard of value, money, being taken for convenience' sake. 1891 Scrivener *Fields & Cities* xx. 194 The Companies Acts..have not, and will not, create wealth; it is not the function of law to create wealth,—only to regulate its distribution. Wealth is created ..by labour. 1920 A. W. Kirkaldy *Wealth* 15 If this definition [Mill's] be accepted, the importance of abundance disappears. Wealth may be a very small as well as a very big thing. A single pin..has exchange value, it is useful, and is therefore wealth...So is a motor-car or a fine yacht or an Atlantic liner.

5. Plenty, abundance, profusion (*of* what is specified). Also, the condition of abounding *in* something valuable.
